

SINGLE POLE HIGH VOLTAGE CONNECTORS 10kV – 100kV

FEATURES

- Up to 100kV_{DC}
- Oil-Tight Receptacles Available
- PTFE Insulation
- Low Contact Resistance
- Extended Temperature Range
- Made in Germany
- Completed Cable Assemblies Available
- RoHS Compliant

APPLICATIONS

- Instrument High Voltage Connections
- Test Stations

DESCRIPTION

The single pole high voltage connector pairs HC7M-xx (cable mounting plug) and HC7F-xx (instrument mounting receptacle) are available for operating voltages of up to 100kV_{DC} in 30A or 80A versions. The connectors are suitable for use with shielded / screened high voltage cable.

The silver-plated central contact, the strong nickel-plated housing and the screw interlock warrant a safe and reliable connection. The cable is fixed to the connector housing by means of an integrated cable gland. The cylindrical wedging results in a strong mechanical connection and an excellent shield connection. Five different sizes of cable glands are available providing usability of a wide range of cable diameters. An external cable gland may be utilized using an M20x1.5 or M25x1.5 adaptor (xx-20 or xx-25 models, respectively).

The connectors are available with PTFE insulation and extended operating temperature range. Optionally the receptacles are available as oil-tight versions. Recessed male contacts may be ordered for the 20kV/80A connectors.

The HC7 plugs and receptacles are intermateable with their counterparts of the SB100 series.

SPECIFICATIONS

Locking system:	threaded coupling
Termination inner contact:	solder (male contact), solder / screw (female contact)
Shield connection:	screw joint / cable gland
Contact surface:	Ag
Case material:	CuZn (brass), nickel plated
Insulation material:	PTFE (Teflon®), white
Flammability class:	UL94 V-0
Temperature range:	-50°C to +200°C
Contact resistance:	30A type (HC7xAx): max. 300μΩ 80A type (HC7xBx): max. 150μΩ
Wire gauge (plugs):	30A type (HC7xAx): max. 2.5mm ² / bore hole: ø2.6mm 80A type (HC7xBx): max. 10mm ² / bore hole: ø4.8mm
Mating / unmating force:	30A type (HC7xAx): 5.5N / 4N 80A type (HC7xBx): 15N / 10N
Mating cycles:	> 100000
Inner cable diameter	max. 10mm
Suitable cable type:	shielded high voltage cable; numerous types available on request, e.g.: 2124 up to 100kV _{DC} , AWG16, PE / PVC, 11.2mm, universal HXC-60-1EA-8 up to 60kV _{DC} , AWG14, EPR / PVC, 11.1mm, highly flexible HSL-15S-6-A-9 up to 15kV _{DC} , AWG10, Silicone, 11.6mm, flexible, high temperature 2024SVJ up to 60kV _{DC} , AWG12, Silicone / PVC, 12.7mm, flexible HSUS-3012-65-2 up to 20kV _{DC} , AWG12, Silicone, 8.9mm, UL (internal wiring), highly flexible, high temperature

Ratings listed above apply to clean connector pairs in standard atmospheric conditions. When connectors are used in an adverse environment (such as high temperature, humidity, pollution content, extreme mechanical exposure etc.) the connector should be derated. The fitness for use must be proved by extended operational tests.

Safety Advice

Design, installation and inspection of machinery and devices carrying high voltage require accordingly trained and qualified personnel. Appropriate safety rules and directives must be complied with. Improper handling of high voltage can mean severe injuries or death and may cause serious collateral damage!
